TECH54

Every Polaris riding jacket, bib, monosuit and boot is made with TECH54, an exclusive technology from Polaris. TECH54 is a waterproof and breathable membrane that locks out moisture, and lets body vapor escape, to keep you warm, dry and comfortable. Visit P. 8 to learn more.

JACKET **TECH54**

OWN THE EXTREMES.
All of our riding jackets are purpose built by our own team of technical experts to provide cold weather comfort, flexibility and a wide range of motion. Select the jacket that is best for your riding conditions with the right amount of warmth and breathability.

BIBS **TECH54**

Warmth, comfortable fit, and flexibility are key in choosing the right bibs. Polaris bibs provide a wider range of motion in the knees, thighs and waist to move with you as you ride.

BALACLAVA

SHIELD THE ELEMENTS.
Keep your face and neck protected from harsh conditions with a balaclava. These are intentionally designed to keep you warm and comfortable with windproof material and an anti-fog design.

TECH54

TECHNOLOGY TO OWN THE EXTREMES

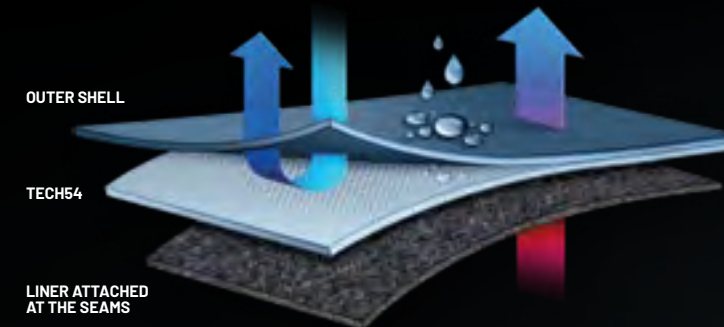

ELEVATE YOUR RIDE WITH EXCLUSIVE TECH54 RIDING GEAR DESIGNED TO KEEP YOU WARM AND DRY.

Our Apparel Center of Excellence developed TECH54—a waterproof, breathable membrane featured in every Polaris jacket, bib and monosuit. This exclusive technology allows perspiration to escape and keeps water out, so no matter how you ride, or where you ride, you stay dry, warm and comfortable.

WATERPROOF/BREATHABLE

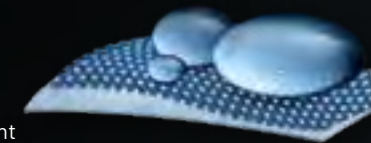

TECH54 is our single-layer bonded laminate technology that brings waterproof breathability and riding comfort to a new level in every Polaris jacket and bib.

DWR

RESIST MOISTURE

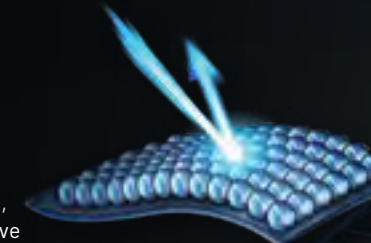

Every Polaris jacket and bib is treated with a DWR (Durable Water Repellent) coating to prevent precipitation from saturating the outer fabric, so your gear doesn't get soggy. The DWR coating causes water to bead up and run off, keeping you comfortable and dry.

3M Scotchlite[™] Reflective Material

RIDE SAFER

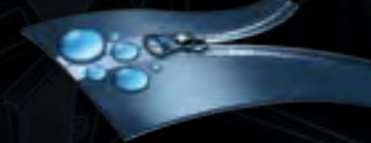

Proven in every weather condition, patented 3M[®] Scotchlite[®] Reflective Material is placed meticulously on each garment and nighttime tested to provide visibility from every angle.

YKK[®] ZIPPER

STAY PROTECTED

Quality construction you can trust.

3M Thinsulate[®] INSULATION

BE WARMER

3M[®] Thinsulate[®] Insulation is zonally mapped on insulated apparel to provide extra insulation in high wind exposure areas.

HOW IT WORKS TO ELEVATE YOUR RIDE.

5k/5k, 10k/10k OR 20k/20k

WATERPROOF

The first number (5k, 10k or 20k) refers to the waterproof rating.

BREATHABILITY

The second number (5k, 10k or 20k) refers to how much water vapor the material can expel through the outerwear to release heat—and keep you dry from the inside.

DIFFERENT RATINGS FOR DIFFERENT RIDES

Choose your TECH54 rating based on the weather conditions and your level of exertion.

5k/5k: best for colder and drier conditions and moderate activity

10k/10k: best for wet riding conditions and high-activity riding

20k/20k: best for extremely wet riding conditions and the most aggressive riding

WOMEN'S RIDING GEAR

Our innovative designs and advanced technical materials keep you warm, dry, and happy – head to toe – on every ride. TECH54 jackets, bibs, and monosuits provide ultimate protection and comfort for every type of rider. And our helmets offer styles, designs, and features just right for the way you ride.

LAYERING

Anyone can layer up. But the key to staying warm and comfortable is picking the right layers for the conditions. Start with our moisture-wicking base layers to help maintain proper body temperature, then add a middle insulating or heated layer depending on the conditions.

LIFESTYLE

Polaris hats, tees and jackets show others how you choose to live your life. This is well-crafted clothing that's purpose-built to keep you comfortable outdoors—right where you want to be.

FOUR KEYS TO TRACK SELECTION

LENGTH

The inside circumference of the track is calculated as the drive pitch multiplied by the number of track segments. It must be correct to the nearest inch for proper fit without additional modifications to the skid frame.

DRIVE PITCH

The drive cog center distance around the circumference of the cogs on the drive axle. It must match the existing track or the drive cogs must be changed.

WIDTH

The measurement across the track governed by the width of the tunnel.

LUG HEIGHT

The distance lugs extend above the track surface.

- Trail: 1" - <1.5"
- On/Off Trail: 1.5" - <2"
- Deep Snow: 2" and greater

OIL DEVELOPMENT

POLARIS INVESTS IN EACH OIL AT AND ABOVE THESE LEVELS.

KEY POINTS OF PROTECTION

PISTON

Pistons play a critical role in engine operation and the wrong oil can lead to power loss, scuffing and poor performance.

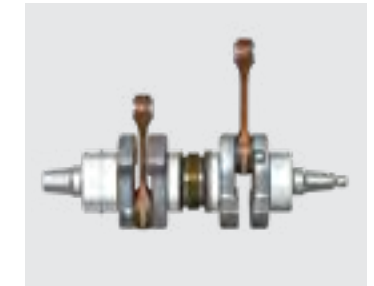

- Maximizes power output while providing excellent film retention to prevent scuffing
- Superior stability in high temperatures, while minimizing carbon deposits and increasing long term reliability
- Oil flows at low temperatures to prevent hard starting

CRANKSHAFT BEARING

Provides hydrodynamic barrier on bearing interfaces to extend upper and lower rod bearing life.

- Provides accurate oiling under extreme cold conditions
- Excellent film retention and heat transfer properties
- Corrosion inhibitors protect during off-season storage

EXHAUST VALVE OPERATION

Exhaust valves control power output during on and off throttle use. Improper lubricants can cause carbon buildup and sticking of valves, reducing power.

- Provides detergency over the life of the exhaust valves
- Minimizes carbon buildup to ensure exhaust valves continue to move freely and keep the engine running at peak power
- Designed to provide smooth valve operation throughout the life of the engine

POLARIS BLUE

*Belt dimensions are given in nominal dimensions. There is a +/- variance for all critical dimensions. Clutch setup must be inspected when a new belt is installed and should be adjusted if necessary. The drive belt is an important component in the CVT system. In order to achieve maximum efficiency from the converter, drive-belt deflection (tension), clutch offset and alignment must be adjusted properly. See your service manual for further details on drive-belt measurement inspection.
