FEATURES & BENEFITS

ALL POLARIS ENGINEERED WINCHES COME WITH:

WARRANTY

- ✓ INTEGRATED WIRING, MOUNT, PREASSEMBLED
- ✓ HOOK WITH STRAP
- ✓ CUT STEEL GEARS & SEALED DRIVETRAIN
- ✓ SEALED PERMANENT MAGNET MOTOR

Retrieve cable 5x as fast as standard mode on other Polaris winches. Get back to riding or complete your task quicker.

1. Set winch dial to N (Neutral) to manually pull the rope out and secure the hook to your anchor point
2. Set winch dial to L (Low) for maximum pulling power while winching your load
3. Set winch dial to H (High) for retrieving the rope 5x faster with Rapid Rope Recovery

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

With its lightweight, yet extremely strong, design and superior flexibility, this 50 ft long synthetic rope is easy to handle and can stand up to any tough job.

This convenient remote operates your Polaris winch wirelessly from within 50 ft of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.

If using Glacier Pro Plow System with tracks, Track Plow Extension is required (2889267)

For year-round use, Polaris recommends the use of Intake Update Kit (2880673) on any RANGER XP 1000 '17, RANGER XP 1000 CREW '14-18 with tracks installed. To keep intake system working optimally, this kit pre-filters out fine snow and dust.

1 INDUSTRY'S FIRST - FLEX-TRACK DESIGN

Front-mounted tracks with flexible sides and slight curve toward the inside to allow stable handling, a more comfortable ride, and precise steering for long-distance riding and long working hours.

2 HIGH-DENSITY TIRE WITH ADJUSTED SHAPE

With puncture-proof tires that reduce friction and wear, the Prospector Pro 2.0 Tracks delivers trouble-free performance.

Take on bumps and obstacles with confidence with the 8" high-density tracks.

3 LIGHTWEIGHT POWDER COAT STEEL FRAME

Proven geometry to improve durability and deliver capability in all conditions throughout the life of the tracks.

The lighter frame provides more flotation to stay on top of the snow and allows the tracks to easily shed snow, mud, and debris.

4 TANDEM STABILIZER

Bolt-on tandem mid-roller wheel provides a smoother ride by absorbing shocks.

5 BEARING HOUSING

Outer seals and stainless steel sleeves allow stronger bearing durability and greater reliability.

6 WHEEL CAP & SEAL

Fitted wheel cap with bladder effect eliminates water absorption due to temperature variation. Ride in snow and mud and not worry about the track maintenance.

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new RANGER is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

SEE OUR LATEST MAINTENANCE TIPS AT RANGER.POLARIS.COM/EN-US/SELF-HELP

AIR FILTER

A clogged air filter can restrict air flow to the engine leading to reduced engine performance, engine life or catastrophic failure.

BRAKE PADS

Maintaining and/or replacing brakes are critical to the safety and functionality of a vehicle. Brake pads should be checked for wear and oil or grease (petroleum products) contamination and brake discs should be checked for cracks, excessive corrosion or warping.

HALF SHAFT

Check for tears and punctures in the boot, which can lead to CV joint wear that can contribute to axle failure.

BATTERY

To ensure a battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a NOCO® Battery Charger (see P. 99). Be sure to check for corrosion from the terminals to the ends of the cables.

DRIVE BELT

Polaris Engineered belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

BREAK-IN PERIOD

- Use lower gear (if available) while varying speeds and avoid wide open throttle for 5-10 miles / 8-16 km
- If no low gear is available, vary at moderate speeds while avoiding wide open throttle for 50 miles / 80 km

OUR INVESTMENT

- 40,000+ miles / 64,00+ km of field testing
- Thousands of dyno hours
- 18+ months of development (13,000+ design hours) per belt
- 1,500+ vehicle validation hours
- Collaboration with powertrain and clutch engineers

YOUR ADVANTAGE

- No clutch recalibration
- Less wear and tear due to heat
- Ensure maximum vehicle performance
- More time riding, less time wrenching
- Produced in collaboration with powertrain and clutch engineers to ensure a perfect fit, maximum performance and ultimate durability

OIL FILTER

Change oil filters with every oil change to provide the best engine protection and keep the engine operating at peak performance.

TIRE SEALANT

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The plug maintains the pressure of the tire so you can continue your ride.

HOW IT WORKS

Tire sealant remains liquefied inside the tire until a leak develops in the tire or wheel.

HOW MUCH TIRE SEALANT DO YOU NEED?

$$\begin{array}{r} \text{TIRE HEIGHT (IN.)} \times \text{TIRE WIDTH (IN.)} / 5 = \text{OUNCES REQUIRED PER TIRE} \\ | \qquad \qquad \qquad | \qquad \qquad \qquad | \\ 27" \times 10" / 5 = 54 \text{ oz} \end{array}$$

FOR A FULL APPLICATION CHART, VISIT POLARIS.COM/TIRESEALANTCHART

PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks and punctures up to .25" on standard tires and .75" on heavy ply tires
- Helps maintain air pressure for the life of the tire
- Helps seal the tire bead against the wheel
- 100% water soluble for easy cleanup
- Will not rust, corrode or pit wheels
- Creates permanent repair
- Remains fluid and effective in temperatures down to -45° F
- Easily installed through existing tire valve stem with valve core removed
